WHERE PRECISION MEETS PERFORMANCE

STEEL COMPONENTS & EQUIPMENT PRODUCTION

Providing comprehensive metal fabrication services, we specialize in precision cutting, bending, machining, and welding. Our facilities and expertise ensure top-quality results. From laser cutting table and CNC Press brake to advanced welding techniques, we offer tailored solutions for diverse industrial needs.

SHEET METAL LASER CUTTING

We cut black metal, stainless steel, and galvanized sheets.

SHEET METAL BENDING AND FOLDING

We Use CNC Press brake

MACHINING

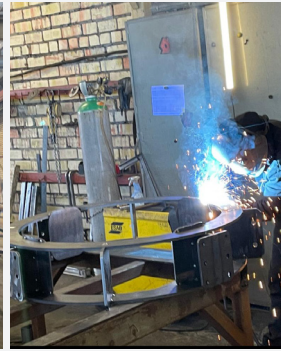

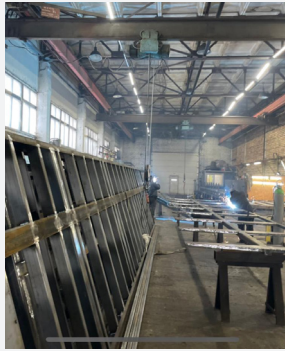

Turning, milling, drilling, shafts, bushes, bearing housings, screws, keys, etc.

METAL PARTS & DETAILS

WELDING

Welding of parts, equipment, devices and their assemblies, various metal structures and pipeline systems.
TIG, MIG/MAG, Arc

PIPEWORK

Cutting of tubular profile material and round steel with band saws.

SURFACE TREATMENT PAINTING OR GALVANIZING

EQUIPMENT ASSEMBLY

EQUIPMENT INSTALLATION

Installation, adjustment, equipment warranties, post-warranty maintenance, and spare parts.
